

# CHOCOLATE CREAM SOILING<sup>+</sup>

For Assessing the Efficiency of Enzymes

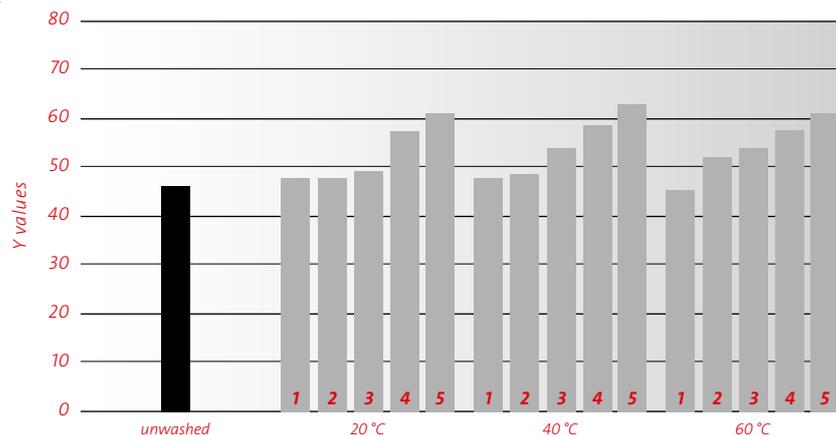

The test fabric is soiled with chocolate cream. It is useable at all washing temperatures.

**article 160**  
soiling on cotton

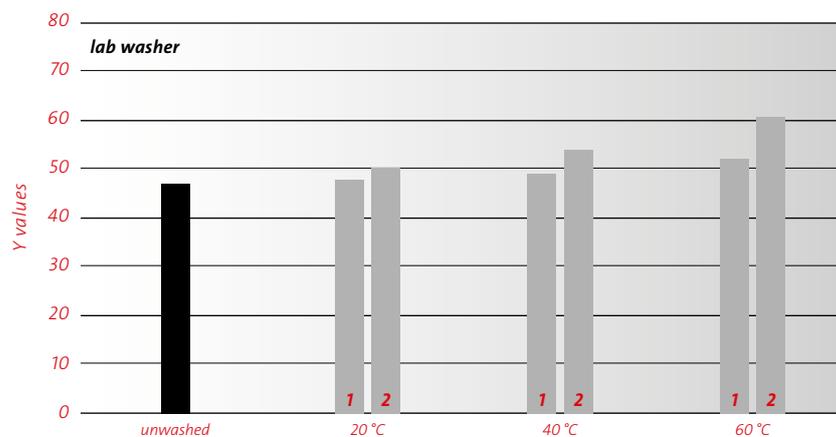

Article 160 is sensitive to amylases, proteases, the washing temperature and to bleaching agents, little affected by other enzymes like lipases, cellulases and mannanases. Not affected by agitation.

## Influence of enzymes

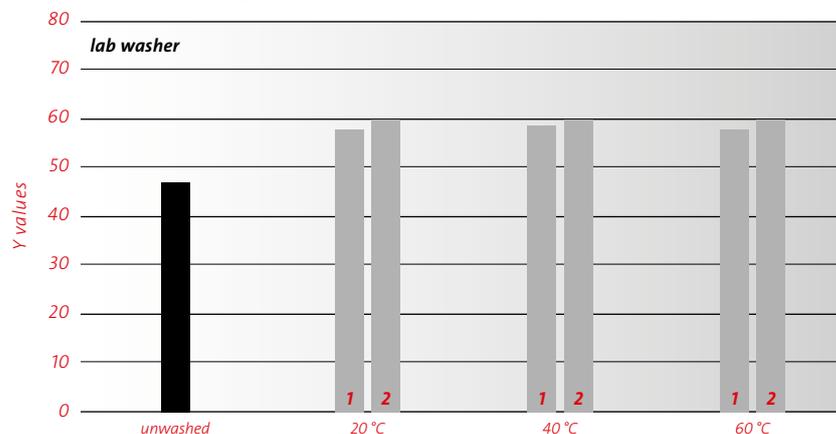

- 1 water
- 2 3.3 g/l ECE'98
- 3 3.3 g/l ECE'98  
0.4% protease
- 4 3.3 g/l ECE'98  
0.4% amylase
- 5 enzyme-mixture consists of (0.4% each):  
protease, amylase, lipase & cellulase

## Influence of bleaching agent

- 1 3.3 g/l ECE'98
- 2 3.3 g/l ECE'98  
0.13 g/l TAED  
0.85 g/l Perborat

## Influence of agitation

- 1 3.3 g/l ECE'98  
0.4% amylase
- 2 3.3 g/l ECE'98  
0.4% amylase  
steel balls
